# SAMPLE QUESTION PAPER

Subject: Computer Science Class: XII (2017-18)

Time	: 3 Hrs	ı.	M.M.:70				
Instru	uctions	:					
	(a) Al	l questions are compulsory,					
	(b) Ar	nswer either Section A or Section B:					
		(i) Section A - Programming Language with C++					
		(ii) Section B - Programming Language with Python					
	(c) Se	ction C is compulsory.					
		SECTION – A (C++)					
Q.	Part	Question Description	Marks				
No.							
Q1.	(a)	What is the role of a parameter/argument passed in a function? Can a default value be	2				
		assigned to a parameter(Yes/No)? If yes, justify your answer with the help of a suitable					
		example otherwise give reason.					
	(b)	Raman suggests Kishan the following header files which are required to be included in					
		the given C++ program. Identify the header files which are wrongly suggested by					
		Raman.					
		Program:					
		void main()					
		{     char Grade;					
		cin.get(Grade);					
		if(isalpha(Grade))					
		<pre>cout.put(Grade); }</pre>					
		Suggested header files:-  1. iostream.h					
		2. stdio.h					
		3. conio.h					
		4. ctype.h					
	(c)	Rewrite the following program after removing the syntactical errors (is any). Underline	2				
		each correction.					

```
Typdef int Num;
     Num full=100;
     Num Calc(int X)
                       full=(X>2)?1:2;
                       return (full%2)
     void main
                       int full=1000;
                       full=Calc(::full);
                       cout<<::full<<"::">>full>>endl;
     }
     Write the output of the following C++ program code(assume all necessary header files
(d)
     are included in program):
      void Encrypt(char *S, int key)
               char *Temp=S;
               if(key%2==0)
                                        }
                       key--;
              while(*Temp!='\0')
                       *Temp+=key;
                       Temp+= key;
               }
      }
      void main()
      {
               int Key_Set[]={1,2,3};
              char Pvt_Msg[]="Computer2017";
               for(int C=0;C<2;C++)
               Encrypt(Pvt_Msg, Key_Set[C]);
              cout<<"New Encrypted Message after Pass "<<C+1<<" is :"<<Pvt_Msg;</pre>
               cout<<endl;
      }
     Write the output of the following C++ program code(assume all necessary header files
(e)
     are included in program):
```

```
struct Ticket
                    char Level;
                    int Price;
            };
            void Compute(Ticket &T)
                    if (T.Level=='A')
                    T.Price+=50;
                             else if (T.Level=='B')
                    T.Price+=30;
                             else if (T.Level=='C')
                    T.Price+=25;
                             cout<<T.Level<<"::"<<T.Price<<endl;</pre>
            }
           void main()
                             Ticket Mon_Show[ ]={{'C',250},{'A',300},{'B',350}};
                             for(int count=2;count>=0; )
                             {
                                      Compute(Mon Show[count--]);
            }
           Consider the following C++ program code and choose the option(s) which are not
     (f)
           possible as output. Also, print the minimum & maximum value of variable Pick during
           complete execution of the program.(assume all necessary header files are included in
           program):
            const int NUM=5;
            void main()
            {
                     randomize();
                     int V1=1, V2=5, Pick;
                     while(V1<V2)
                              Pick = random(NUM) + (V2-V1);
                              cout<<Pick<<":";
                              V1++;
                     }
            }
                  (a) 5:6:6:6:
                  (b) 4:7:5:3:
                  (c) 8:6:1:2:
                  (d) 7:5:3:1
Q2.
           What do you mean by Data Abstraction in OOPs? Explain its significance in
                                                                                                  2
     (a)
           programming with a suitable example.
           Answer the question (i) & (ii) after going through the following code. (assume all
     (b)
                                                                                                  2
           necessary header files are included in program):-
```

```
class Game
               char Name[21];
               int No_of_Players;
      public:
                                                //Function 1
               Game()
                       strcpy(Name, "Cricket");
                       No of Players=11;
                       cout<<"New Game Starts\n";
                                                //Function 2
               Game(char N[],int No)
                       strcpy(Name,N);
                       No_of_Players=No;
                       cout<<Name<<"comprises"<<No_of_Players<<" number of players\n";</pre>
               ~Game()
                                                //Function 3
                       cout<<"Game Ends\n";
      };
         (i)
                Give the name of the feature of OOP which is implemented by Function 1 &
                2 together in the above class Game.
         (ii)
                Anuj made changes to the above class Game and made Function 3 private.
                Will he be able to execute the Line 1 successfully given below? Justify.
                                         void main()
                                                Game ABC;
                                                                     //Line 1
      Define a class Bill in OOP with the following specification:-
(c)
                                                                                                  4
      Private members:
         1. Bill_no
                                         type long(bill number)
         2. Bill_period
                                         type integer(number of months)
         3. No_of_calls
                                         type integer(number of mobile calls)
         4. Payment_mode
                                         type string("online" or "offline")
         5. Amount
                                         type float(amount of bill)
         6. Calculate_Bill() function to calculate the amount of bill given as per the
             following conditions:
                                                  Calculation Rate/call
                            No_of_calls
                                                       (in rupees)
                               <=500
                                                           1.0
                             501-1200
                                                          2.0
                               >1200
                                                          4.0
```

Page No. 4

Also, the value of Amount should be reduced by 5% if Payment\_mode is "online".

### **Public members:**

 A member function New\_Bill() that will accept the values for Bill\_no, Bill\_period, No\_of\_calls, Payment\_mode from the user and invoke Caluclate\_Bill() to assign the value of Amount.

4

- 2. A member function Print\_Bill() that will display all details of a Bill.
- (d) Answer the question from (i) to (iv) based on the given below code(assume all necessary header files are included in program):-

```
class City
        int City Id;
        char City_Name[30];
protected:
        int City Population;
public:
        City();
        void Get Population();
        void New City();
        void Show_City();
};
class State : public City
        int State Id;
        char State_Name[25];
protected:
        int State_Population;
public:
        State();
        void New State();
        void Print_State();
};
class Country : private State
        int Country Id;
        char Country_Name[25];
public:
        Country();
        void New_Country();
        void Display_Country();
};
```

- (i) Write name of the class whose constructor is invoked first on the creation of a new object of class Country.
- (ii) Write name of the data members which are accessible through the object of class Country.

		(iii) List name of the members which are accessible through the member function				
		"void New_Country()".				
		(iv) What will be the size(in bytes) of an object of class Country & State				
		respectively.				
Q3	(a)	Write the definition of function named <b>Array_Swap()</b> that will accept an integer array &	3			
		its size as arguments and the function will interchange/swap elements in such a way that				
		the first element is swapped with the last element, second element is swapped with the				
		second last element and son on, only if anyone or both the elements are odd.				
		E.g. if initially array of seven elements is:				
		5, 16, 4, 7, 19, 8, 2				
		After execution of the above function, the contents of the array will be:				
		2,16, 19, 7, 4, 8, 5				
	(b)	An array A[50][30] is stored along the row in the memory with each element requiring 4	3			
		bytes of storage. If the element A[10][15] is stored at 21500, then find out the base				
		address of the array and the memory address of element stored at location A[30][25]?				
	(c)	Write the definition of a member function <b>Q_Insert()</b> for a class <b>Exam_Queue</b> in C++	4			
		to insert a new <b>Application</b> information in a dynamically allocated queue whose code is				
		already given below as a part of the program(assume all necessary header files are				
		included in program):				
		struct Application				
		{     int App_Id;				
		char App_Name[21]; Application *Link;				
		};				
		<pre>class Exam_Queue {</pre>				
		Application *Front, *Rear;				
		<pre>public:      Exam Queue() //Constructor</pre>				
		{				
		Front=Rear=NULL;				
		<pre>void Q_Insert ();</pre>				
		<pre>void Q_Delete(); };</pre>				
	(d)	Write the definition of a user-defined function <b>REPEAT_ROW(int A[][3],int R, int C</b> )	2			
	(u)	in C++ that will store the elements in the following manner	<i>L</i>			
		1. All row elements except the 1 <sup>st</sup> element replaced by the 1 <sup>st</sup> element,				
		2. All row elements except the 1 st & 2 <sup>nd</sup> element replaced by the 2 <sup>nd</sup> element,				
		3. All row elements except the 1 st, 2 <sup>nd</sup> & 3 <sup>rd</sup> element replaced by the 3 <sup>rd</sup> element and				
		5. An row elements except the 1 , 2 & 5 element replaced by the 5 element and				

so on. For example: if initially the array was:-**10** 2 5 6 2 6 9 12 18 14 5 Then, the contents of the array after execution of the above function will be:-5 5 5 5 2 6 6 6 18 14 14 14 Evaluate the following POSTFIX expression. Show the status of Stack after execution of 2 (e) each operation separately: TRUE, FALSE, OR, NOT, TRUE, FALSE, AND, OR Answer the questions (i) & (ii) in the program segment given below for the required task. Q4. (a) class Route { int Route No; //Route Number //Name of Route char Route Name[21]; int No Kms; //Distance in kms on Route public: void New Route(); //Accepts details of new Route void Show Route(); //Display details of a Route int Get RouteNo() //Return the Route Number return Route\_No; } void Update\_Kms(int K) No Kms=K; }; void Update\_Route(int No, int New\_Kms) //Update No\_Kms of a Route fstream File("ROUTE.DAT",ios::in | ios::out | ios::binary); while(!File.eof()) File.read((char\*)&R, sizeof(R)); if( (R.Get\_RouteNo()==No)) R.Update\_Kms(New\_Kms); //Statement 1 //Statement 2 cout<<"Route Details updated\n"; } File.close(); } Write Statement 1 to position the file pointer to the appropriate place so that (i) the data updation is done for the correct Route. (ii) Write Statement 2 to perform the write operation so that the updation is done

		in the binary file "ROUTE.DAT".	
	(b)	Write a user-defined function named <b>Count()</b> that will read the contents of text file	2
		named "Report.txt" and count the number of lines which starts with either 'I' or 'M'.	2
		E.g. In the following paragraph, there are 2 lines starting with 'I' or 'M':	
		"India is the fastest growing economy.	
		India is looking for more investments around the globe.	
		The whole world is looking at India as a great market.	
		Most of the Indians can foresee the heights that India is capable of reaching."	2
	(c)	Consider the following class Item:- class Item {	3
		int ItemId;	
		int Quantity; float Price;	
		public:	
		<pre>void NewItem() {</pre>	
		cin>>ItemId>>Quantity>>Price; }	
		void ShowItem()	
		<pre>{     cout&lt;<itemid<<":"<<quantity<<":"<<price<<endl;< pre=""></itemid<<":"<<quantity<<":"<<price<<endl;<></pre>	
		}	
		<pre>void Set_Price(float P) {     Price=P; }</pre>	
		int Ret_Id()	
		{ return ItemId; }	
		};	
		Write a function named Change_Item(int Id, float Pr) to modify the price of the item	
		whose ItemId & new price are passed as an argument.	
		SECTION – B (Python)	
Q1	(a)	Differentiate between break and continue statement with the help of an example.	2
	(b)	Identify and write the name of the module to which the following functions belong:	1
	(c)	i. ceil() ii. findall()  Observe the following Python code very carefully and rewrite it after removing all	2
		syntactical errors with each correction underlined.	
		<pre>DEF execmain():     x = input("Enter a number:")</pre>	
		if $(abs(x) = x)$ :	
		print"You entered a positive number" else:	
		x=*-1	
		print" Number made positive:"x	
		execmain()	
	(d)	Write the output of the following Python code:	2
<u> </u>			

```
i=5
            j=7
            x=0
            i=i+(j-i)
            x=j+i
            print x,":",i
            j=j**2
            x=j+i
            i=i+1
            print i,":",j
      (e)
           Write the output of the following Python program code:
                                                                                                   3
            Data =['D','o',' ','I','t',' ','@',' ','1','2','3',' ','!']
            for i in range(len(Data)-1):
                if (Data[i].isupper()):
                     Data[i]=Data[i].lower()
                elif (Data[i].isspace()):
                     Data[i]=Data[i+1]
            print Data
      (f)
           Study the following program and select the possible output(s) from the options (i) to (iv)
                                                                                                   2
           following it. Also, write the maximum and the minimum values that can be assigned to
           the variable Y.
            import random
           X= random.random()
           Y= random.randint(0,4)
           print int(X),":",Y+int(X)
           i) 0 : 0
           ii) 1:6
           iii) 2:4
           iv) 0:3
Q2
           Explain operator overloading with the help of an example.
      (a)
      (b)
           Observe the following Python code and answer the questions (i) and (ii):
            class BOOK :
                count=0
                def __init__(self): # Function 1
                     self.Author="Not assigned"
                     self.Publisher = "Not assigned"
                     self.ISBN = "Not assigned"
                def display(self):
                    print self.Author, self.Publisher, self.ISBN
                @staticmethod
                def bookcount(): # Function 2
                     BOOK.count=BOOK.count+1
                     return BOOK.count
           How is data member 'count' different from data member 'Author'?
      (i)
                                                                                                   1
      (ii)
           Fill in the blanks:
           B = BOOK()
                                              #Write statement to invoke Function 2
```

		#Write statement to invoke Function 3						
(	(c) Define a class COURSE in Python with the following description :							
		Instance Attributes:						
		REGNO Integer						
		CNAME String						
		Score Float						
		Fees Float						
		Methods:						
			sign REGNO as 0, Score					
				e basis of the Score input as				
		per the following cr		<del></del>				
		Score	CNAME	Fees				
		>=9.0 -<=10.0	Clinical Psychology	10000.0

(	(i)	Explain the relationship between L	ine 1, Line 2 and Line 3.					
(	(ii)	Predict the output that will be prod	uced on the execution of	the following statements:				
		rcar=RacingCar('Blue',2,206,	78.5,6,200)					
		rcar.start()						
		rcar.turn("left")						

Q3	(a) (b)	Write the definition of a function Reverse(X) in Python, to display the elements in reverse order such that each displayed element is the twice of the original element (element * 2) of the List X in the following manner:  Example:  If List X contains 7 integers is as follows:    X[0]   X[1]   X[2]   X[3]   X[4]   X[5]   X[6]     4	3				
	(0)	[22, 54, 12, 90, 55, 78] Write the passes of selection sort for sorting the list in ascending order till the 3 <sup>rd</sup> iteration.	3				
	(c)	Consider the following class Order and do as directed:  class ORDER:  L=[]  definit(self):     self.OID = 0  def insertorder(self):     self.OID = input("Enter Order Id")  ———————————————————————————————————	4				
	d)	Write a generator function to generate odd numbers between a and b(including b).Note: a and b are received as an argument by the function.					
	(e)	Evaluate the following postfix expression using a stack. Show the contents of stack after execution of each operation:  10,40,25,-,*,15,4,*,+					
Q4.	(a)	Nancy intends to position the file pointer to the beginning of a text file. Write Python statement for the same assuming F is the File object.					
	(b)	Write a function <b>countmy()</b> in Python to read the text file "DATA.TXT" and count the number of times "my" occurs in the file.  For example if the file "DATA.TXT" contains:  "This is my website. I have displayed my preferences in the CHOICE section."  The <b>countmy()</b> function should display the output as:  "my occurs 2 times".					
	(c)	Write a function in python to search and display details of all those students, whose stream is "HUMANITIES" from pickled file "Student.dat". Assuming the pickled file is containing the objects of the following class:	3				

class	STUDENT:	
de	finit(self):	
	self.RNO = 0	
	self.NAME = " "	
	self.STREAM = " "	
	self.PERCENT = 0.0	
de	f ACCEPT(self):	
	self.RNO = input("Enter Roll no")	
	self.NAME = raw input("Enter Name")	
	self.STREAM = raw input("Enter Stream")	
	self.PERCENT = input("Enter percentage")	
de	f DISPLAY(self):	
	print self.RNO, self.NAME, self.STREAM, self.PERCENT	
de	f RET STREAM(self):	
	return(self.STREAM)

Q5 Differentiate between DDL & DML. Identify DDL & DML commands from the (a) following:-

(UPDATE, SELECT, ALTER, DROP)

Consider the following relation MobileMaster & MobileStock:-(b)

### **MobileMaster**

M_Id	M_Company	M_Name	M_Price	M_Mf_Date
MB001	Samsung	Galaxy	4500	2013-02-12
MB003	Nokia	N1100	2250	2011-04-15
MB004	Micromax	Unite3	4500	2016-10-17
MB005	Sony	XperiaM	7500	2017-11-20
MB006	Oppo	SelfieEx	8500	2010-08-21

## **MobileStock**

S_Id	M_Id	M_Qty	M_Supplier
S001	MB004	450	New Vision
S002	MB003	250	Praveen Gallery
S003	MB001	300	Classic Mobile Store
S004	MB006	150	A-one Mobiles
S005	MB003	150	The Mobile
S006	MB006	50	Mobile Centre

Write the SQL query for questions from (i) to (iv) & write the output of SQL command for questions from (v) to (viii) given below:-

(i) Display the Mobile company, name & price in descending order of their

(ii) List the details of mobile whose name starts with 'S' or						
	ends with 'a'.					
(iii) Display the Mobile supplier & quantity of all mobiles e	ŕ					
(iv) List showing the name of mobile company having p	•					
5000,						
(v) SELECT M_Id, SUM(M_Qty) FROM MobileStock GR	COUP BY M_Id;					
(vi) SELECT MAX(M_Date), MIN(M_Date) FROM MobileMaster;						
(vii) SELECT M1.M_Id, M1.M_Name, M2.M_Qty, M2.M_Supplier FROM						
MobileMaster M1, MobileStock M2 WHERE M1.N	M_Id=M2.M_Id AND					
M2.M_Qty>=300;						
(viii) SELECT AVG(M_Price) FROM MobileMaster;						
Q6. (a) State & prove De-Morgan's law using truth table.	2					
(b) Draw the equivalent logic circuit diagram of the following Boolean	expression:- 2					
(A' + B).C'						
(c) Write the SOP form for the Boolean Function F(X,Y,Z) represent	ted by the given truth 1					
table:-						
X Y Z F						
0 0 0						
0 0 1 1						
0 1 0 1						
0 1 1 0						
1 0 0 0						
1 0 1 0						
1 1 0 1						
1 1 1 1						
(d) Reduce the following Boolean expression using K-Map:-	3					
$F(U,V,W,Z) = \pi(0,2,5,7,12,13,15)$						
Q7. (a) A teacher provides "http://www.XtSchool.com/default.aspx"	to his/her students to 1					
identify the URL & domain name.						
(b) Which out of the following does <b>not</b> come under Cyber Crime?	1					
(i) Copying data from the social networking account of a p	erson without his/her					
information & consent.						
(ii) Deleting some files, images, videos, etc. from a friend's comp	outer with his consent.					
(iii) Viewing & transferring funds digitally from a person's	bank account without					
his/her knowledge.						
(iv) Intentionally making a false account on the name of a	celebrity on a social					

	networking site.							
(c)	Expand the following:-							
	1. GSM 2. TDMA	<b>L</b>						
(d)	What is the significance of cookies store	of cookies stored on a computer?						
(e)	Kabir wants to purchase a Book online	e a Book online and he has placed the order for that book using						
	e-commerce website. Now, he is going	to pay the amou	unt for that book online using his					
	Mobile, then he needs which of the follow	owing to comple	te the online transaction:-					
	1. A bank account,							
	2. Mobile phone which is attached	to above bank a	ccount,					
	3. The mobile banking app of the a	above bank instal	lled on that mobile,					
	4. Login credentials(UID & Pwd)	provided by the	bank,					
	5. Or all of above.							
(f)	What do you mean by data encryption?	For what purpos	se it is used for?					
(g)	Sanskar University of Himachal Prades	h is setting up a	secured network for its campus at					
	Himachal Pradesh for operating their day-to-day office & web based activities. They are							
	planning to have network connectivity between four buildings. Answer the question (i) to							
	(iv) after going through the building positions in the campus & other details which are							
	given below:							
		\ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \						
	Admin	Main Building						
			Academic					
	Finance		Academic					
	The distances between various building	s of university a	re given as:-					
		s of university as <b>Building 2</b>	re given as:-  Distance(in mtrs.)					
	Building 1	Building 2	Distance(in mtrs.)					
	Building 1  Main  Main	Building 2 Admin	Distance(in mtrs.) 50					
	Building 1  Main  Main	Building 2  Admin  Finance	Distance(in mtrs.) 50 100					
	Building 1  Main  Main  Main  Admin	Admin Finance Academic	Distance(in mtrs.) 50 100 70					

7	T	1	~ t			4	
ľ	Jum	ner	OL	COI	nb	ute	rs:-

Building	No. of Computers
Main	150
Admin	75
Finance	50
Academic	60

As a network expert, you are required to give best possible solutions for the given queries of the university administration:-

1

1

1

- (a) Suggest cable layout for the connections between the various buildings,
- (b) Suggest the most suitable building to house the server of the network of the university,
- (c) Suggest the placement of following devices with justification:
  - 1. Switch/Hub
  - 2. Repeater
- (d) Suggest the technology out of the following for setting-up very fast Internet connectivity among buildings of the university
  - 1. Optical Fibre
  - 2. Coaxial cable
  - 3. Ethernet Cable
